Definition (Slide 3)

- CIT is a program that provides the foundation necessary to promote community and statewide solutions to assist individuals with a mental illness. The CIT Model reduces both stigma and the need for further involvement with the criminal justice system. CIT provides a forum for effective problem solving regarding the interaction between the criminal justice and mental health care system and creates the context for sustainable change.

- CIT (Crisis Intervention Team) programs are local initiatives designed to improve the way law enforcement and the community respond to people experiencing mental health crises. They are built on strong partnerships between law enforcement, mental health provider agencies and individuals and families affected by mental illness.
